

Success through teamwork

We work together to find a better way and break new ground to make progress possible. Focused on common goals, we raise the standard and make a difference. We strive for excellence in everything we do.

At ICON, career possibilities can become realities for those who look for challenges and embrace learning and growth opportunities.

ICON Clinical Research is dedicated to providing the pharmaceutical and biotechnology industries with exceptional clinical research and biometrics services.

To continue our legacy of excellence, ICON Development Solutions, a dynamic and innovative Product Development Organization committed to helping pharmaceutical and biotech companies bring products through development from early stage to regulatory approval, is now the Strategic Pharmaceutical Development Division of ICON.

Join us in one of our current openings and enjoy highly competitive benefits and exceptional advantages.

Senior SAS Programmer Ellicott City, MD ICON Development Solutions

The successful candidate will lead the programming effort on various projects. Write programs in support of analyses to be performed by pharmacokineticists. Write programs to generate listing and summary tables for inclusion in clinical study reports, as described in the applicable Analysis Plan. Provide all necessary documentation of all programs. Draft, finalize, and implement programming guidelines and SOPs. Provide technical resource for SAS (e.g. SAS upgrades, licenses, etc.). Work under the direction and supervision of Manager, Clinical Data Management. Provide SAS training to ICON personnel as necessary. Balance concurrent tasks/priorities within defined timelines.

Minimum of a Bachelor's degree with at least 7 years' SAS experience and at least 5 years' pharmaceutical, biotechnology, or health-related industry experience. Strong analytical, organizational, and communication skills is a must.

Come to ICON and be an important part of a well respected and growing company that believes the details of your career are every bit as critical as the work you do. You'll enjoy highly competitive benefits in addition to flexible scheduling, relocation assistance, tuition reimbursement, credit union, health club privileges, and many other exceptional advantages.
